GAME IS FUN AS HELL! only down side is its dead! 1 server and ther person is not even playing haha. wish there were other games like this one but very active.. bleep bloop. First off let me say that the game has amazing potential and I really hope it takes that potential and runs with it to create the fun, rewarding game I know it can be. Pro's: 1. Skill Based Combat : Aiming/Timing is key in this game especially when playing a ranged base character. There is plenty of room for players to outplay one another and I love that and im sure plenty of other pvp junkies do too. Nothing like going in a fight with low hp and out playing a full hp player. 2. Variety: There are 4 different classes to choose from, with plans to add more in the future. Each class has a choice of a few weapons each with a variety of effects from slowing people with auto attacks to burning them over time etc. On top of each class having different weapons they each have the ability to choose two skills out of a list of a couple of skills adding a huge variety of gameplay styles mixing and matching skills and weapons. 3. Gameplay Modes/Map Variety: There are several modes to choose from, ranging from a control point to last man standing and others. There also is a handfull of unique maps to play on with a nice unique medieval twist. Con's: *Note this is a Early Access game so I understand bugs and whatnot are to be expected, just some thoughts on what i feel needs some love* 1. Bot AI can use a little bit of work, occasionally i've seen them get stuck or fall off maps. Also they can sometimes take a while to find each other when it comes down to only bots left. For the most part though they aren't too bad and do occasional suprise me with some nasty combos 2. Balancing: I know its early access and I would love to see a few tweaks to certain skills etc. Not to worried about this the devs seem very active and open to feedback and im sure in due time well get some balance changes. But for the most part I seem to be able to kill any of the other classes with any class. So overall I think this game has HUGE potential and look forward to seeing how it develops over the course of its early access cycle. I can not wait to play ranked games against other players and climb the leaderboards or level my class to earn class based rewards, features i've heard that will eventually be coming our way. I'd give the game a solid 8/10 with potential to be a 10/10 as it progresses.. love this game cant wait to see more people playing
